

General Situation

The heat low-pressure cell covers upper Thailand with hot to very hot and haze during the day. People in the country should keep healthy due to hot to very hot weather. The westerly trough from Myanmar will cover the North in the night while the southwesterly and southerly winds prevail over the upper country with isolated thundershower with gusty wind and hails. People in the areas should beware of severe conditions.

The northwesterly wind prevails over the Andaman Sea while the southeasterly wind prevails over the Gulf and the South with isolated thundershower. All ships should proceed with caution and keep off thundershowers.

In addition, **during 3-5 May 2024**, the westerly trough move pass the upper North and the upper Northeast of Thailand while **during 6-7 May 2024**, the confluence of southeasterly and southerly winds prevail over the Northeast, the East, the Central and the lower North regions while hot to very hot weather occurs in the upper country. Summer storms are possible following with thunderstorms, gusty wind and lightning strike in many places of the upper country while hails are possible in some places.
