3-month Climate Prediction of Thailand During July – September 2026

Issued on 22 June 2026

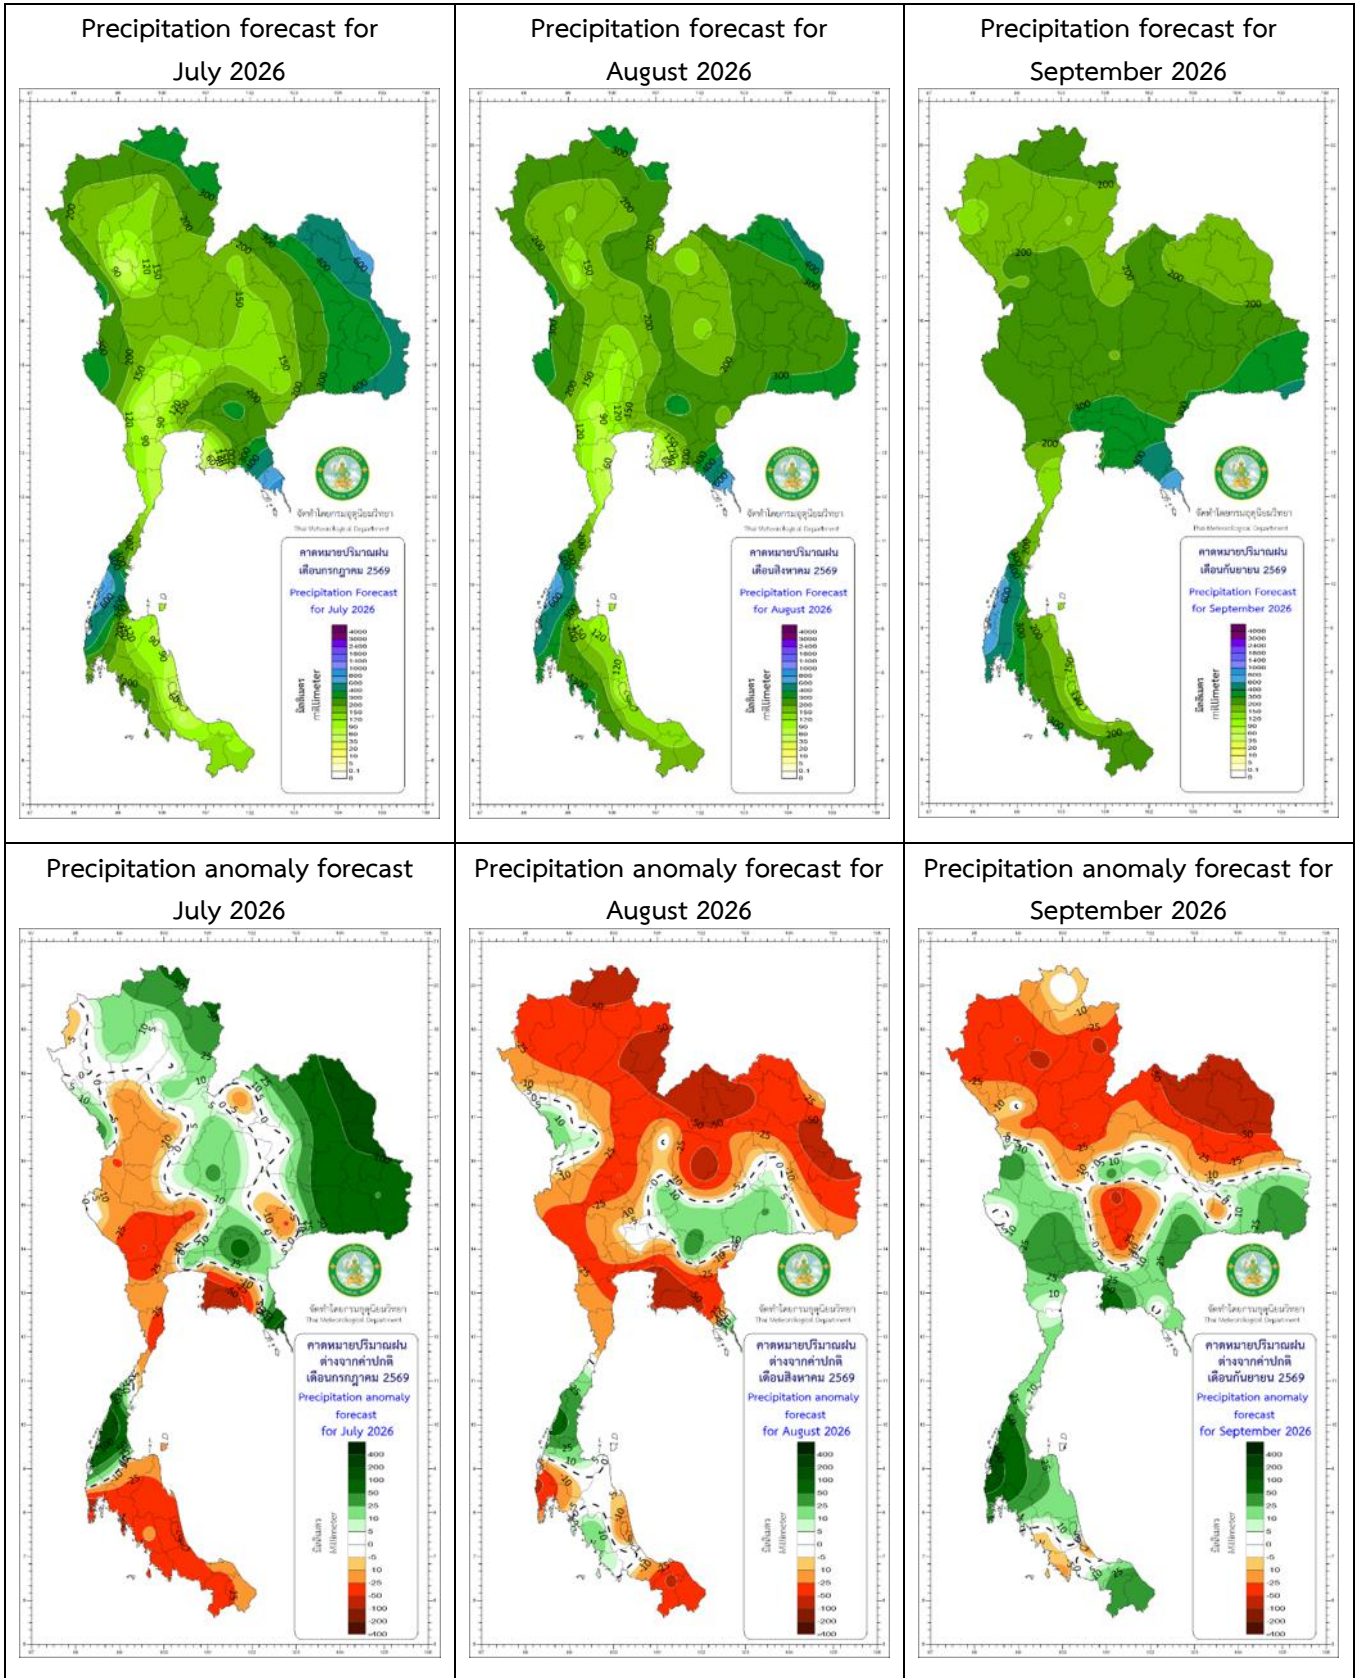

Thailand climate for February – March - April from 30-year normal (A.D. 1991 - 2020 or B.E. 2534 - 2563 baseline average)

July : During the 1st half of this month, the dry spell will often occur continuously from late June because the low-pressure trough still prevails over the southern portion of China along with the Southwest Monsoon prevailing over Thailand mostly weakens. As a result, many areas will meet little or no rain continuously for many days. Later during the 2nd half of this month, abundant rainfall will happen again because of the coming back low-pressure trough moving downward to place over the Upper Thailand together with the Southwest Monsoon prevailing over Thailand becoming more active periodically. Additionally, some tropical cyclones may move near or toward Thailand along the eastern portion of Thailand.

August : Commonly, densely abundant rainfall often occurs in this month with more monthly rain amount than previous months each year. The reason is that the low-pressure trough places over the northern and northeastern parts of Thailand along with the active Southwest Monsoon prevail over Thailand periodically. Additionally, some tropical cyclones may move closer or toward the upper portion of both of the northern and northeastern parts more than other parts.

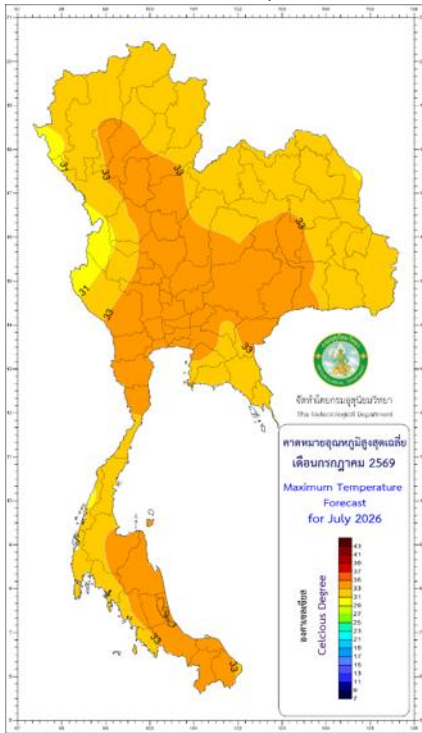

September : Thailand will meet densely abundant rainfall. In fact, most areas will be affected by the most densely abundant monthly rainfall for the whole year. The reason is that the influential low-pressure trough places on the central portion of Thailand along with some tropical cyclones move to dissipate near or toward Thailand directly, specifically at the eastern portion of the country.

Precipitation (mm/month) and Anomaly (mm/month) Forecast:

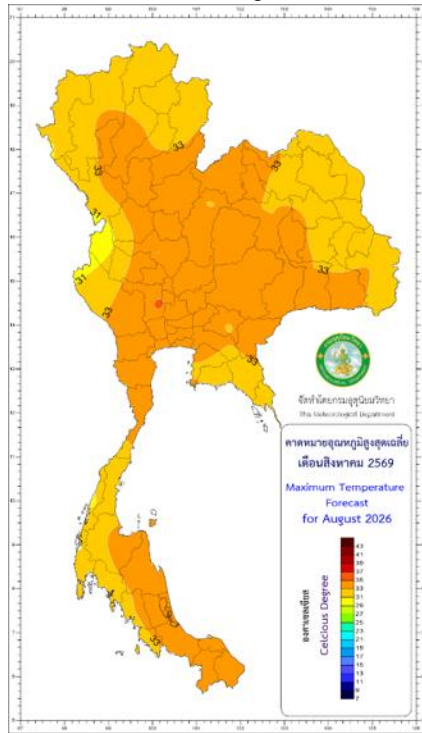

Mean Maximum Temperature (°C) and Anomaly (°C) Forecast:

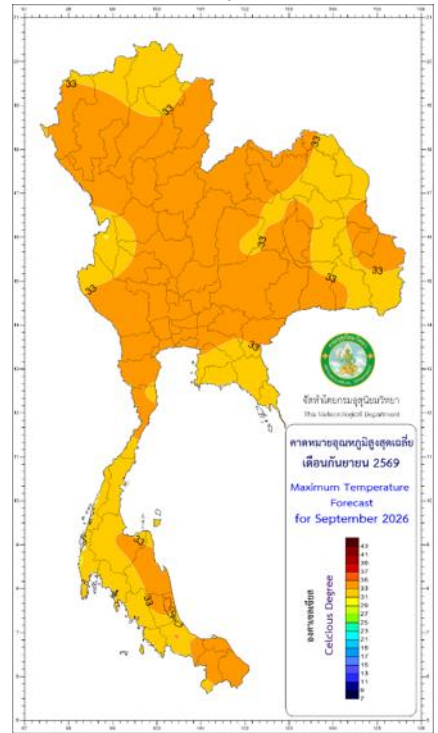

Mean maximum temperature forecast for July 2026

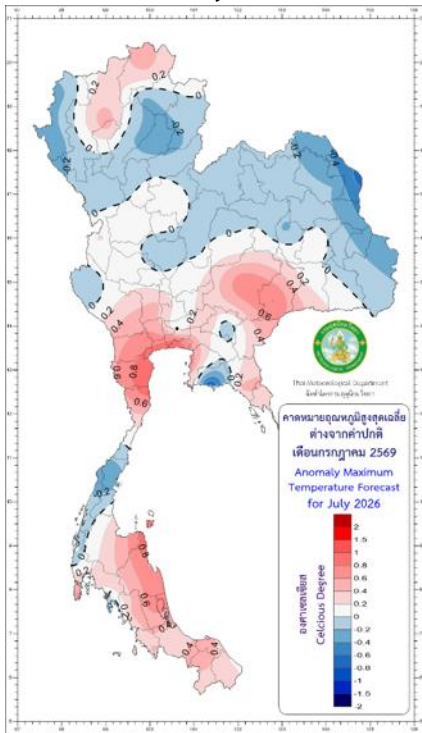

Mean maximum temperature forecast for August 2026

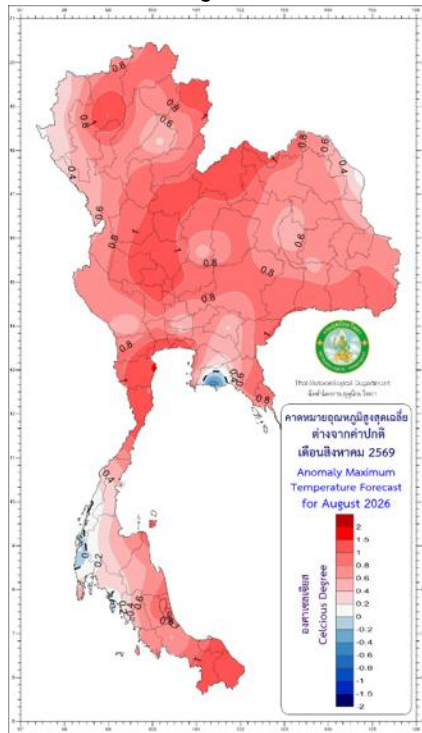

Mean maximum temperature forecast for September 2026

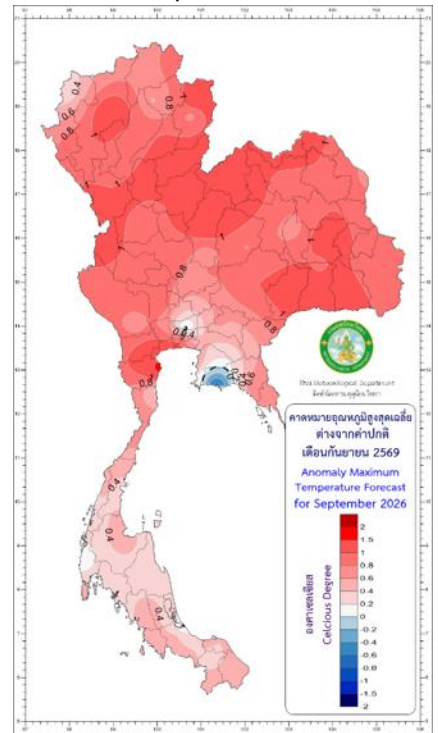

Mean maximum temperature anomaly forecast for July 2026

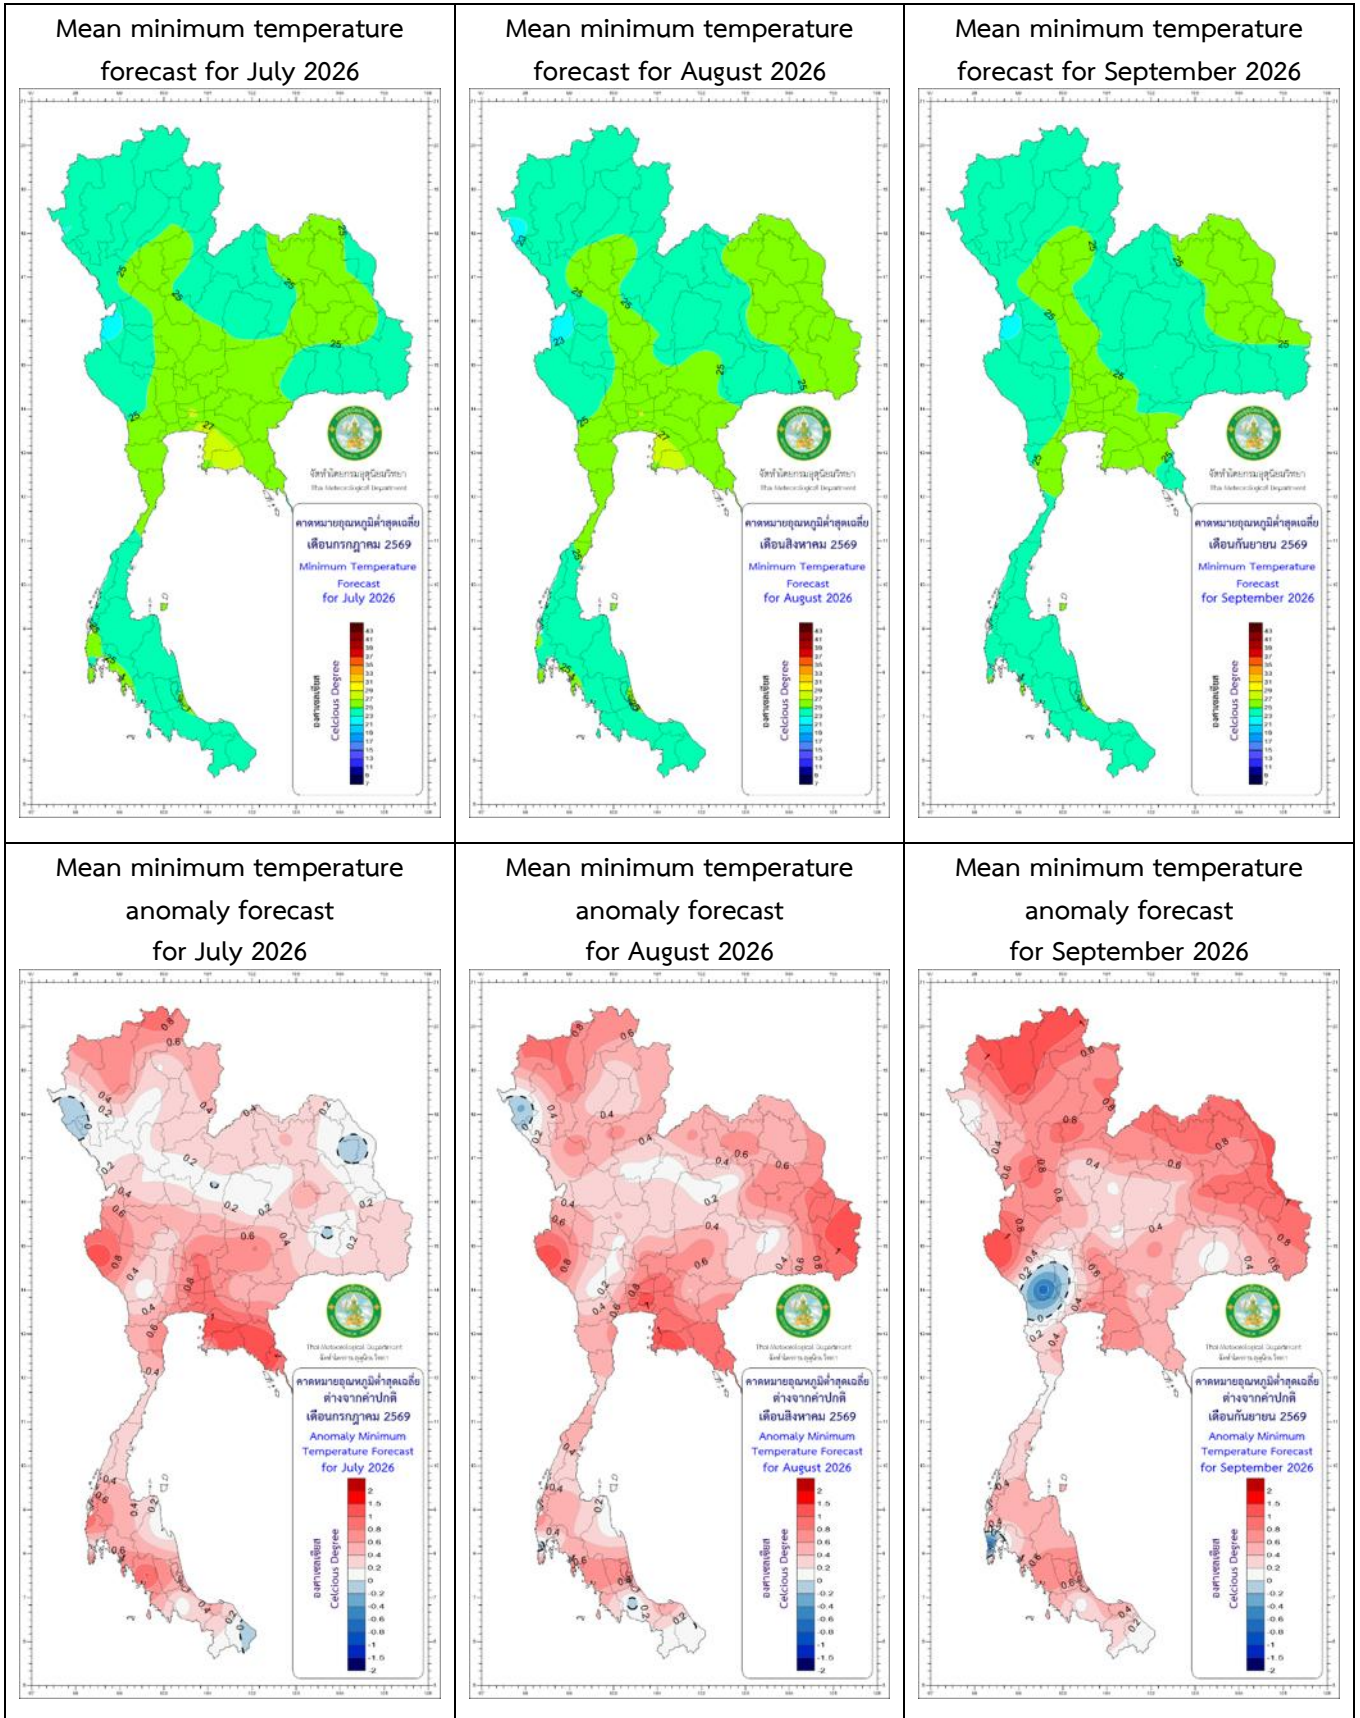

Mean maximum temperature anomaly forecast for August 2026

Mean maximum temperature anomaly forecast for September 2026

Mean Minimum Temperature (°C) and Anomaly (°C) Forecast:

*** Caution: ***

July : Some tropical cyclones may develop at the western side of the northern Pacific Ocean and move pass the Philippines toward the South China Sea. Then, they may move northwesterly pass the Gulf of Tonkin and influence the Southwest Monsoon prevailing over Thailand and the Gulf of Thailand to strengthen. Consequently, Thailand will meet more rainfall, especially at the eastern part and the Southern Thailand (west coast).

August and September : Some tropical cyclones may develop at the western side of the northern Pacific Ocean and move northwesterly pass the South China Sea. They favor a high chance to pass the Upper Thailand causing Thailand to meet dense rainfall with heavy to very heavy rain amount at many areas, especially around the areas where the tropical cyclones move trough. Consequently, flash and forest flood with overflow will inundate at many areas. Thus, the public should follow the weather forecast news and tropical cyclone warnings from the Thai Meteorological Department further.

The below Image illustrates 7 parts of Thailand with seasons and Monsoons or wind:

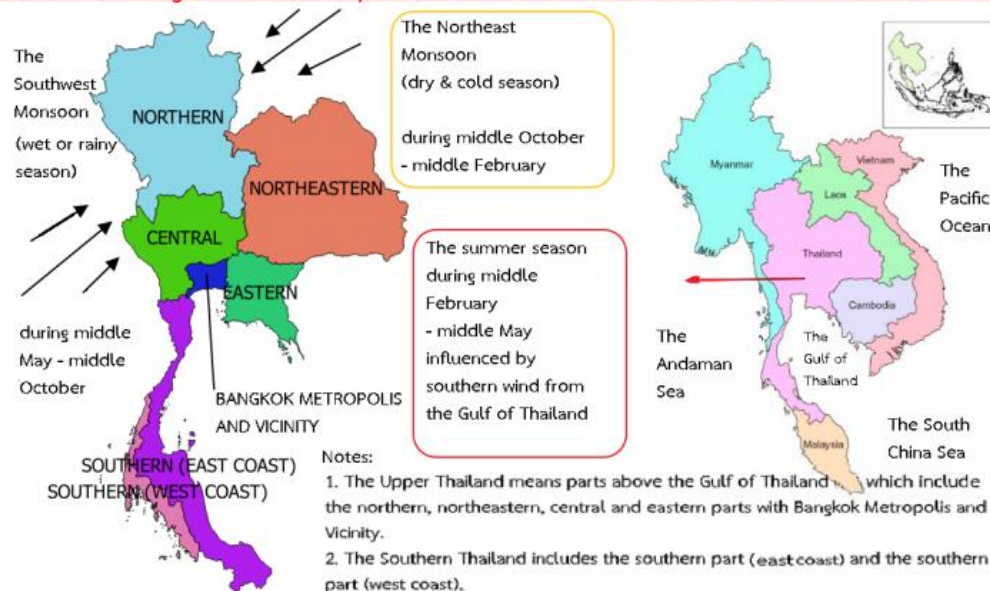

Table 1: Prediction of Rain (mm = millimeters), Rainy Days (days) and comparing with normal

Part	Prediction									Normal (Baseline period: 1991-2020)					
	July 2026			August 2026			September 2026			July		August		September	
	Rain (mm)	Rainy Days	Comparing with normal	Rain (mm)	Rainy Days	Comparing with normal	Rain (mm)	Rainy Days	Comparing with normal	Rain (mm)	Rainy Days	Rain (mm)	Rainy Days	Rain (mm)	Rainy Days
Northern	180-220	18-20	5 % Above normal	190-230	20-22	10% Below normal	180-220	17-19	10% Below normal	189.6	19.6	237.8	21.1	222.0	18.3
Northeastern	260-310	18-20	20 % Above normal	230-280	18-20	10% Below normal	200-250	17-19	10% Below normal	242.8	17.9	277.5	19.4	256.6	17.9
Central	120-160	15-17	10% Below normal	140-180	17-19	10% Below normal	200-250	18-20	Near normal	152.1	16.9	172.9	18.4	238.1	19.3
Eastern	270-320	17-19	Near normal	230-280	17-19	10% Below normal	360-410	19-21	10 % Above normal	289.0	17.6	285.6	18.3	351.7	19.9
Southern Thailand (East Coast)	80-120	13-15	20% Below normal	100-140	14-16	10% Below normal	140-180	16-18	10 % Above normal	119.6	14.8	130.6	15.3	147.0	16.2
Southern Thailand (West Coast)	320-380	19-21	Near normal	400-450	19-21	Near normal	450-500	21-23	10 % Above normal	349.4	19.6	419.2	20.4	429.2	21.8
Bangkok Metropolis and Vicinity	170-210	17-19	10 % Above normal	170-210	18-20	10% Below normal	340-390	20-22	10 % Above normal	183.4	17.2	211.7	19.1	325.8	21.4

Table 2 : Prediction of Mean Maximum Temperature (Tmax) comparing with normal:

Part	Prediction						Normal (Baseline period: 1991-2020)*		
	July 2026		August 2026		September 2026		July	August	September
	Mean Tmax	Comparing with Normal	Mean Tmax	Comparing with Normal	Mean Tmax	Comparing with Normal	Mean Tmax	Mean Tmax	Mean Tmax
Northern	31-33	Near normal	32-34	Above normal	32-34	Above normal	32.4	31.9	32.4
Northeastern	32-34	Near normal	32-34	Above normal	32-34	Above normal	32.8	32.3	32.1
Central	33-35	Near normal	33-35	Above normal	33-35	Above normal	33.6	33.3	33.1
Eastern	32-34	Near normal	32-34	Above normal	31-33	Near normal	32.4	32.2	32.0
Southern (East Coast)	32-34	Near normal	33-35	Above normal	32-34	Above normal	33.0	33.0	32.6
Southern (West Coast)	31-33	Near normal	31-33	Near normal	31-33	Near normal	31.8	31.6	31.3
Bangkok and Vicinity	32-34	Near normal	33-35	Above normal	33-35	Above normal	33.4	33.3	33.1

Table 3 : Prediction of Mean Minimum Temperature (Tmin) comparing with normal:

Part	Prediction						Normal (Baseline period: 1991-2020)*		
	July 2026		August 2026		September 2026		July	August	September
	Mean Tmin	Comparing with Normal	Mean Tmin	Comparing with Normal	Mean Tmin	Comparing with Normal	Mean Tmin	Mean Tmin	Mean Tmin
Northern	23-25	Near normal	23-25	Near normal	23-25	Above normal	24.2	24.0	23.8
Northeastern	24-26	Near normal	24-26	Above normal	24-26	Above normal	24.7	24.5	24.2
Central	24-26	Near normal	24-26	Near normal	24-26	Near normal	24.8	24.6	24.4
Eastern	25-27	Above normal	25-27	Above normal	24-26	Above normal	25.5	25.4	24.9
Southern (East Coast)	24-26	Near normal	23-25	Near normal	23-25	Near normal	24.4	24.3	24.2
Southern (West Coast)	24-26	Above normal	24-26	Near normal	23-25	Near normal	24.5	24.5	24.1
Bangkok and Vicinity	26-28	Above normal	26-28	Above normal	25-27	Above normal	26.1	25.8	25.4

Remarks: - * Normal means average during the 30-year period (A.D. 1991 – 2020 or B.E. 2534 – 2563).

- This long-range climate forecast is created by applying some climate models and statistical methods, the public then should follow the daily weather forecast news from the Thai Meteorological Department for more accuracy further.
- The next 3-month climate forecast will be published online before the end of December 2024.
- Further enquiry of monthly climate, 3-month climate and seasonal forecasts can be preceded at Tel: (662)-398-9929 or Fax: (662)-383-8827
