

**General Situation**

The low-pressure cell over the coast of Malaysia will move into the monsoon trough lies and cover Malaysia to the Malacca Strait and the lower Andaman Sea **during 8 to 11 December 2022**. Meanwhile, the moderate northeast monsoon prevails across the Gulf of Thailand the South and Andaman Sea. Isolated heavy to very heavy rains and strengthening wind force the waves are likely in the lower South. People should beware of severe condition and rain accumulation that may cause flash floods and overflows, especially along the foothills near waterways and lowlands. The lower Gulf up to about 2 meters high and above 2 meters high in thundershowers. All ships in the lower Gulf should proceed with caution and keep off thundershowers.

The moderate high-pressure system covers upper Thailand and the South China Sea, leading to morning cool. Meanwhile, the easterly winds at high altitude bring about isolated light rain over the country. People should keep healthy and farmers should prevent for crop damage.
