

Weather Forecast: During 20 – 22 May, the southwesterly wind prevailing over the Andaman Sea, Thailand and the Gulf will strengthen and the low-pressure cell covers the upper Vitenam while during 22 – 25 May, the low-pressure cell over the lower Bengal bay will intensify and expected to move to the upper Bengal bay. More rains and isolated heavy rains are likely in the country, isolated very heavy rains are possible in the upper country and the South (west coast). The strengthening winds and waves are likely 2 - 3 meters high in the upper Andaman Sea and above 3 meters in thundershowers, while are about 2 meters high in the lower Andaman Sea and above 2 meters in thundershowers. The winds and waves are likely about 1 meter in the Gulf, 1-2 meters high offshore and above 2 meters in thundershowers.

Warning: During 20 – 25 May, people should beware of heavy to very heavy rains and accumulations that may cause flash floods and overflows, especially along foothills near waterways and lowlands. All ships in the Gulf and the Andaman Sea should proceed with caution and keep off thundershowers throughout the period.
