Weather Outlook During 11 – 17 May 2026

Weather Forecast: During 11 - 12 May 2026, thundershowers still present in the upper country with isolated heavy rains mostly in the western part because the southeasterly and the southerly winds prevails across the upper country. The strengthen southeasterly wind prevails across the Andaman Sea, the Gulf and the South with more rains and isolated heavy rains. The winds and waves in the Gulf and Andaman Sea are expected about 1 meter high and above 2 meters high in thundershowers. **During 13 - 17 May 2026**, more rains in the upper country with isolated heavy rains due to the southwesterly and the southerly winds prevails across the upper country. The strengthen southwesterly wind prevail across the Andaman Sea, the Gulf and the South with thundershowers and isolated heavy rains especially in the western part. The winds and waves in the upper Andaman Sea are about 2 meters high and above 2 meters high in thundershowers.

Warning: People in the upper country and the South should beware of heavy rain and accumulation that may cause flash floods and overflows especially along the waterways near foothills and lowlands. **All ships** in the Gulf and Andaman Sea should proceed with caution and keep off thundershowers area **throughout the period**.

The weather forecast is valid from Monday this week until Sunday next week
