

Weather Forecast: During 8 – 9 Jun 2026, the moderate southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf while the low-pressure cell covers upper Vietnam. Isolated heavy rains are forecast in the North, the upper Northeast, the East and the South (west coast).

During 10 – 14 Jun 2026, the moderate to rather strong southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf while during **10 – 12 Jun 2026**, the monsoon trough will lie across Myanmar, the upper North into the low-pressure cell over upper Laos and upper Vietnam. More rains and isolated heavy rains are forecast in the country while isolated very heavy rains are possible in the western part of the North and the Central during **13 – 14 Jun 2026**.

The moderate wind and waves in the upper Andaman Sea are expected about 2 meters high, 1 - 2 meters high in the lower Andaman Sea and the Gulf of Thailand and above 2 meters high in thundershowers **throughout the period**.

Warning: During 10 – 14 Jun, people in the country, especially in the western part of the North and the Central should beware of heavy to very heavy rains and accumulation that may cause flash floods and overflows especially along the waterways near foothills and lowlands.

All ships in the Gulf and the Andaman Sea should proceed with caution and keep off thundershowers **throughout the period**.
