Daily Weather Forecast Distribution
On Thursday 10 July 2025
Time Issued 1100 LST

General Situation

The low-pressure cell covers upper Vietnam with the moderate southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf. Isolated heavy rain is likely in Thailand with isolated very heavy rain in the North and the East. People in the country should beware of heavy rain to very heavy rains and accumulation that may cause flash floods and overflows, especially along the waterways near foothills and lowlands.

The moderate wind and waves in the upper Andaman Sea are expected about 2 meters high and above 2 meters high in thundershowers. In the lower Andaman Sea and the upper Gulf, the waves are expected 1-2 meters high and above 2 meters high in thundershowers. All ships in the Andaman Sea and the Gulf should proceed with caution and keep off thundershowers.

In addition, during 11-13 Jul, the monsoon trough will lie across upper Myanmar, the upper North, the upper Northeast and upper Vietnam while the low-pressure cell over the upper Vietnam will move through the monsoon trough. At the same time, the moderate southwest monsoon remains over the Andaman Sea, Thailand and the Gulf. Isolated very to very heavy rains are likely in the North, the Northeast, the East and the South.
