Daily Weather Forecast Distribution

Thursday 7 May 2026

Issued at 0500 LST

General Situation

Another high-pressure system from extends to the lower China, expected to cover the upper Vietnam, the upper Laos including the upper Northeast and the South China Sea by today (7 May 2026) with the southerly and southeasterly winds bring the moisture from the South China Sea and the Gulf to the upper country where hot weather occurs. More rain with gusty winds and heavy rain are likely in the country.

People in the country should beware of severe conditions by keeping off outdoor places, big trees and unsecured billboards including beware of the heavy rain and accumulated rain that may be flashing floods and overflows. Farmers should prevent for crop damage and animals danger. People in the upper country should keep healthy due to variable weathers

The easterly wind prevailing over the South and the Gulf is strengthening with heavy rain in the South. The wind and wave in the Gulf and the Andaman Sea are likely about 1 meter and above 2 meters in thundershower. All ships should proceed with caution and keep off thundershowers.
