Daily Weather Forecast Distribution

Tuesday 2 June 2026

Issued at 0500 LST

General Situation

The rather strong southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf while an active low-pressure cell covers the middle coast of Vietnam. Continuous rainfalls and isolated heavy rain are likely in the country mostly in the western part while isolated very heavy rains are possible in the South (west coast) region. People in Thailand should beware of heavy to very heavy rains and its accumulation that may cause flash flood and overflows, especially along foothills near waterways and lowlands.

The rather strong wind forces the waves in the upper Andaman Sea from Phuket northward up to be 2–3 meters high and above 3 meters high in thundershowers. In the lower Andaman Sea from Krabi downward and the upper Gulf, the waves are expected about 2 meters high and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers, small boats in the upper Andaman Sea keep ashore.

Weather Forecast for Thailand from 6.00 a.m. Tuesday to 6.00 a.m. Wednesday

North	Scattered thundershowers and isolated heavy rain in Tak and Kamphaeng Phet. Minimum temperature 22-26 °C. Maximum temperature 35-37 °C. Southwesterly winds 10-25 km./hr.
