

**General Situation**

The low-pressure cell covers upper Vietnam while the moderate southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf with isolated heavy rains in the East and the eastern part of the Northeast regions. People in the areas should beware of heavy rains and accumulation that may cause flash floods, overflows and landslides especially along the waterways near foothills and lowlands.

The moderate wind and waves in the Andaman Sea and the upper Gulf are expected 1-2 meters high while about 1 meter high in the lower Gulf and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers.

In addition, typhoon “BAVI” over Pacific Ocean is expected to move through Tywan and will mak landfall over the eastern part of China during 11 – 12 Jul 2026. The storm is forecast to not move to Thailand. The travelers should check the weather forecast for the region you're going to be visiting.

**Weather Forecast for Thailand from Tuesday Noon to Wednesday Noon**

<b>North</b>	Scattered thundershowers mostly in Mae Hong Son, Chiang Mai, Nan, Uttaradit, Tak, Kamphaeng Phet and Phetchabun. Minimum temperature 23–26 °C. Maximum temperature 31–35 °C. Southwesterly winds 10–20 km./hr.
