Daily Weather Forecast Distribution

Saturday 8 August 2026

Issued at 2300 LST

General Situation

The monsoon trough lies across the upper North and upper Laos into the low-pressure cell over the Gulf of Tonkin while the rather strong southwest monsoon prevails over the Andaman Sea, Thailand and the Gulf. Isolated heavy rains are forecast in Thailand and isolated very heavy rains are possible in the North and the Northeast regions. People should beware of heavy to very heavy rains and accumulation that may cause flash floods, overflows and landslides especially along the waterways near foothills and lowlands.

The rather strong winds force the waves in the upper Andaman Sea and the upper Gulf up to be 2–3 meters high and above 3 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers, small boats in the upper Andaman Sea and the upper Gulf should keep ashore.

In addition, typhoon “DOLPHIN” over the East China Sea is forecast to make landfall over Zhejiang, China during 9–10 Aug 2026. This storm will not move into Thailand. Travelers should check the weather forecast for the region they are going to be visiting.

Weather Forecast for Thailand from to Saturday midnight to Sunday midnight

<u>North</u>	Fairly widespread thundershowers and heavy rain in Mae Hong Son, Chiang Mai, Lampang, Phrae, Sukhothai, Tak, Kamphaeng Phet, and Phichit. Isolated very heavy rain in Chiang Rai, Phayao, Nan, Uttaradit, Phitsanulok, and Phetchabun. Minimum temperature 22-27 °C. Maximum temperature 31-35 °C. Southwesterly winds 10-20 km./hr.
