Daily Weather Forecast Distribution

Tuesday 16 December 2025

Issued at 1700 LST

General Situation

The rather strong northeast monsoon prevails over the Gulf, the South and the Andaman Sea with isolated heavy rains in the lower South. People should beware of heavy to very heavy rains and accumulations that cause flash flood and overflows, especially along the waterways near foothills and lowlands. The rather strong wind forces the waves in the lower Gulf up to be 2-3 meters high and above 3 meters high in thundershowers. In the upper Gulf, the waves are likely about 2 meters high and above 2 meters high in thundershowers. All ships in the Gulf and the Andaman Sea should proceed with caution and keep off thundershowers, small boats in the lower Gulf keep ashore until 16 December 2025.

The high-pressure system still covers the upper country and the South China Sea with cool weather and morning fog. People in the upper country should keep healthy due to cold weather and beware of travel pass the foggy area.

Weather Forecast for Thailand from 6.00 p.m. Tuesday to 6.00 p.m. Wednesday
