

Prediction of Rainy Season June to October 2009

General Condition

Southwest monsoon will prevail over Thailand throughout the period and occasionally strengthen. During mid-June to mid-July, it is expected to be a period of less rain and dry spell. Thailand will become to receive a great amount of rainfall from August to September and heavy downpour will also be likely to bring floods in some areas. From mid-October, little rain will return to upper Thailand but torrential rain will be in southern part especially in east coast..

Generally speaking, the amounts of rainfall in most areas are expected to be normal, nevertheless several places will receive below average of rainfall.

Rainfall Prediction for Rainy Season 2009
